

PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-oriented web applications using React, Next, TypeScript, Node.js, Express.js, and PostgreSQL. Skilled in authentication systems, REST API development, RBAC workflows, and scalable frontend architecture. Built multiple end-to-end projects focused on performance, maintainability, and responsive user experience.

SKILLS & CERTIFICATIONS

Programming Languages: TypeScript, JavaScript, C, HTML5, CSS3

Frontend: React.js, Next.js, Redux Toolkit, React Router, Tailwind CSS

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, WebSockets, JWT, OAuth 2.0

Databases: PostgreSQL, MongoDB, Firebase

DevOps & Cloud: Docker, GitHub Actions (CI/CD), Microsoft Azure, Vercel

Tools: Git, GitHub, Postman, VS Code

WORK EXPERIENCE

JayamSoft Global Service LLP, Surat, Gujarat

Full Stack Developer Intern

Jan 2026 – Apr 2026

- Worked on a logistics and parcel delivery platform built with React.js, Express.js, PostgreSQL, and Redux Toolkit supporting 4 different user roles.
- Developed and integrated 15+ REST API endpoints for shipment tracking, authentication, delivery workflows, and order management.
- Implemented JWT authentication, Google OAuth 2.0, and role-based access control for customers, admins, business clients, and delivery partners.
- Built reusable frontend components and improved state management using Redux Toolkit to reduce unnecessary API calls.
- Collaborated in an Agile development environment using Git, GitHub, and modular backend architecture practices.
- Explored WhatsApp automation workflows using Bailey's WebSocket integrations for real-time communication features.

PROJECTS

Sarjan Healthcare - Healthcare Management Platform

- Built a production-style healthcare management platform using React.js, TypeScript, Node.js, Express.js and PostgreSQL.
- Designed role-based access control for patients, doctors, receptionists and administrators.
- Developed secure REST APIs for authentication, patient records and appointment workflows.
- Configured CI/CD workflows using GitHub Actions and prepared the application for Azure deployment.
- Integrated Docker for containerized development.

Craftfolio - A Portfolio Website Builder | [GitHub Repository](#)

- Built a portfolio builder with 10+ customizable sections and downloadable code generation functionality.
- Developed a real-time template editor using React.js and TypeScript with centralized data handling and service management.
- Implemented a save-and-resume feature that allows users to continue their work from where they left off.
- Added a template configuration system through the admin panel, making it easier to add new templates using template_id - based frontend configuration.

WebAuthn Passkey Authentication System | [GitHub Repository](#)

- Built a passwordless authentication system using WebAuthn, React.js, TypeScript, Node.js, Express.js, and PostgreSQL.
- Implemented secure passkey registration and authentication flows with session-based authentication and role-based authorization.
- Designed REST APIs for credential registration, authentication, session management, and protected route access.
- Configured a production-ready backend architecture with Docker, Azure deployment, GitHub Actions CI/CD, and environment-based configuration.

EDUCATION

C. K. Pithawala College of Engineering and Technology, Surat, Gujarat, India

Graduated: May 2026

BE in Computer Engineering

CGPA: 8.61 out of 10.00

Coursework: Web Programming, Database Management System, Cloud Computing, Software Engineering, Data Structures, Object Oriented Programming - I, Analysis & Design of Algorithms, Information Security
